

Purbalok Sanitization Update

To all Purbalok Resident,

We have successfully started the Sanitization process. Till 6th street we have completed today.

We are doing it in very detailed level, every houses front, walls etc. thoroughly. Entire Purbalok which has around 18-20 streets and nearly 950+ houses, ideally, it's not possible to complete in a day, so in Phase wise it will be carried out. Now we will be starting asap the next phases II, III and so on to target the entire locality.

Already we started the process like-procuring the chemical sodium hypochlorite and PPE kit, arranging further funds for this activity and keep taking & booking slots with WB Fire dept to provide us their vehicle like today, so that back to back we can carry out to finish this sanitization activity. We will make sure we cover all streets of Purbalok.

Also requesting every individual take care of own houses, keep sanitized regularly with own initiatives, with sanitizer, disinfectants, sodium hypochlorite solution, appointing cleaning vendors etc. Also let us know if we can assist anything in this. If we all aware and sanitized, COVID 19 pandemic can be stopped for further spreading in Purbalok.

Many thanks to all for standing with us, believing us to roll out this activity smoothly.

Note: Due to the road blockage by car parking, few houses left for 3rd & 5th street, that we will cover next time.

Thank You

Arindrajit Sarkar,

Secretary, Purbalok Sanghati Club
